EXPERIMENT Title  ADVACED SUB ARRAY PROBLEM  You are competing in a basketball contest. In this contest the score for each successful shot depends on both the depends	, G*
You are competing in a basketball contest. In this contest the score for each successful shot depends on both the d	listance
from the basket and the player's position. The ball is snot in times, successfully. You are given an array A containing	ر the المراقعة the المراقعة ا المراقعة المراقعة ال
multiplying the position with the distance from the basket.  Your task is to find and return an integer value, representing the maximum possible score you can achieve by choos	-
Your task is to find and return an integer value, representing the maximum possible score you can achieve by choos contiguous subarray of size K from the given array.	ing a
Note:	
Note:  * A subarray is a contiguous part of array.	38R13CD
* Assume 1 based indexing.	361
* The array contains both negative and positive values.  * Assume the player is standing on a cartesian plane.	(-
	2350005
Input Format	Ÿ
- input1:An integer value N representing the number of shots made by the player - input2: An integer K representing the size of subarray	a.R.
	0053BR
- input3 : An array of integers
